ADEMCO LAUNCHES CLOUD-BASED TIME ATTENDANCE SOLUTION

Singapore

Monitoring employee movement has just become easier, accurate and more cost-effective with the launch of Ademco Security Group's VerifCloud, an innovative cloud-based time-attendance system that helps companies improve productivity and human resource management.

Replacing the laborious manual data processing and computing procedures of the traditional punch card system, VerifCloud's unique biometric fingerprint reader system collects and uploads employee time-attendance data on a cloud platform with a non-proprietary interface to HR systems for easy centralised management. This not only delivers greater efficiency and accountability when it comes to tracking but also eliminates any possibility of abuse from "buddy punching".

Monitoring employee movements easily and effortlessly, the system simplifies the gathering of time-attendance data, which is aggregated online for easy editing and reconciliation to aid in the payroll calculation process. Access to the data is available 24 hours, making it ideal for companies that have multi-location operations such as retail chains, hotels and food and beverage companies.

"Ademco's VerifCloud has been designed to help companies track and better manage their manpower resources to increase overall staff productivity and efficiency," said Toby Koh, Group Managing Director of Ademco Security Group. "Saving on time, effort and cost, it not only eliminates the possibility of human error that comes with manually inputting and calculating time-attendance data, but also frees up human resource personnel to focus on higher value work".

Business Registration No: 197700631N

With Ademco's VerifCloud two-year management service contract of S\$155 a month per unit, which includes a biometric reader and the cloud based time-attendance service, companies enjoy greater cost efficiency without any initial cash outlay for the server infrastructure set up and associated maintenance costs. There is a further option to own the server infrastructure at the end of the lease period. The adoption of cloud technology also means that companies qualify for a 400% tax deduction or a 60% cash payout under the Productivity and Innovation Credit (PIC) scheme.

VerifCloud is available exclusively at Ademco Security Group Pte Ltd. For enquiries, contact 6224 7377.
