

PRESS RELEASE

**LGA TELECOM HEATS UP SINGAPORE'S NEXTGEN NBN
WITH MISSION CRITICAL CLASS OF SERVICE**

Singapore

Homegrown communications service provider LGA Telecom Pte Ltd is set to raise the ante in the local race to power up Singapore's new era of fibre broadband communications, with its announcement of a new suite of Next Generation Nationwide Broadband Network (NGNBN) enabled quality ultra high-speed business communications solutions.

Central to the launch will be LGA Telecom's delivery of *Mission Critical Class of Service* to help SMEs and enterprises boost productivity and competitiveness in this age of telecommuting, with the unveiling of its Business Class iFibre™ (corporate line access) and TeléFibre™ (residential line access).

With high-speed Internet access of 100Mbps, companies will get extra value for their NGNBN with LGA Telecom's inclusion of its business collaboration suite, which will enhance work-life balance and office productivity. Work will no longer just revolve around a 9 to 5, desk-bound office environment.

Fully secured, this suite comprising Email, Instant Messaging, Document Sharing, Calendar and Address Book, will enable teams to work remotely, by communicating and collaborating seamlessly from any device, 24x7. The package is being offered at special promotional rates of S\$298.00 per month and includes a NGNBN Business Class 100Mbps iFibre™ as well as a 100Mbps TeléFibre™, which also comes with a waiver of the standard one time charge. There is also the option of additional TeléFibre™ at \$39.00 per month.

Enterprises can also take advantage of a more extensive business bundle offering, which comes with a host of managed services, which includes free firewall, VPN, network monitoring and maintenance.

"At LGA, We mean Business. Our packages have been specially developed to deliver *Mission Critical Class of Service* that meet the stringent business demands of lower latency, uninterrupted access to the Internet and corporate Intranet securely. Next Generation businesses need resilient, redundant and secured communications services which is exactly what we are delivering with our NGNBN value offerings!" said Daniel Ang, Chief Executive of LGA Telecom.

In addition, LGA Telecom offers Private IP Cloud service over the Next Gen NBN with Layer 3 MPLS Virtual Private Network that enables the convergence of voice, data and video applications over an integrated network infrastructure, giving companies' highly scalable connectivity that can grow with their business.

As a leading and innovative Communications Service Provider, LGA Telecom has been in the Infocomm industry since 1995. The company's strength lies in leveraging on technology to create value for customers to be productive and profitable.
